

Eve Cho

Software Engineer

516-660-2605 | e.young.echo@gmail.com | Albertson, NY
github.com/echos-echo | linkedin.com/in/echos-echo | [echos-echo.link \(portfolio\)](https://echos-echo.link)

Full Stack Engineer and lifelong learner seeking to solve problems by connecting creativity with code.

Technical Skills

- Proficient: JavaScript, Node.js, React / Redux, Git, Express, HTML / CSS, Axios
- Knowledgeable: Python, C, Java, PostgreSQL
- Computer Science Theory

Technical Projects

Optimate | Software Engineer, October 2022 | [Try it out](#) | [GitHub](#)

- Dating app in which users are matched with recommended users via an algorithm based on set preferences
- Drew up wireframes, created an animated background, enabled a user to edit and view their profile settings, and allowed a user to delete their account

Grace Shopper Pokemon TCG | Software Engineer, Lead UI/UX, September 2022 | [GitHub](#)

- Mock E-commerce site that sells Pokemon cards: create an account, login, add cards to cart, "check out"
- Built with JavaScript, React / Redux, Express, Less CSS
- Integrated data from a Pokemon TCG API, displayed cards based on search/sort queries, allowed for pagination, and created wireframes as well as site theme

I See Hue | Solo Project, September 2022 | [Try it out](#) | [GitHub](#)

- A single row, color sorting game. Built using React and react-beautiful-dnd to enable drag & drop functionality

Randomized Recommendations Discord Bot | Solo Project, 2020 | [GitHub](#)

- Users prompt the bot with or without a genre specification to respond with a random book recommendation along with relevant information and links to acquire it (now retired)

Experience/Volunteer Work

Island Photography, Production Staff and Photographer (Temporary) — May 2022 - July 2022

- Worked in-office to make sure photos were high quality and being matched with the correct client before being sent out; marked and quality checked over 2000 photos
- Occasionally worked at events to take photos and adapted to deliver consistent quality even when equipment spontaneously failed

Midnight Oil Barista, RIT (temporary) — September 2019 - May 2020

- Prepared food items while attending to customers in an efficient but amenable manner for the cafe

Education

Fullstack Academy Web Development Bootcamp — August 2022 - October 2022

- 13 week course where I learned React, Redux, PostgreSQL, Express, as well as other essential libraries for full stack engineers to have in their arsenal. Pair programmed daily along with several projects in the curriculum.

Rochester Institute of Technology — August 2018 - May 2022

Incomplete Bachelor of Science in Computer Science

Cooper Union STEM Program — July - August 2016 | [GitHub](#)

- Worked in teams of 3-5 people to prototype a marketable product within 6 weeks; our team proposed a thermos heatable via bluetooth, which began appearing in the market a few months afterward.
